

Personal Portfolio Website

Currently in development

TODO

- ~~make the website respond to screen size~~
 - ~~EX. make project image disappear if window is too small~~
- ~~fix some sections and font size when window is small~~
- Add support for different screen sizes
 - ~~!! Fix project images overflowing on smaller screen sizes~~
 - need more testing with other screen sizes
 - work on resume and gallery page
 - set max width for resume section
 - test with different screen sizes
 - make it support phone screens
 - ~~about~~
 - ~~project page~~
 - ~~resume~~
 - gallery page
 - play around with 'About' page (photo on left, bio on right etc)
 - make left bar font responsive
 - ~~!! MAKE Font responsive~~
- Fix gallery
- Add dark mode support
 - ~~turns off when navigating to new page (Fixed)~~
 - play around with the color palette
- ~~Devtools failed to load error~~
- Change tab logo
- Change the color palette
 - ~~change the green background~~
- remove dead/unused code
- ~~safari/chrome bottom bar blocks content~~

- test it more
- Rename some of the classes names
